Hi William,

My fellow Region 9 Mike may have additional info, but I can confirm that R9 plans to issue as a news release a Statement from the RA responding to the State of California's publicly announcing their Exide/NPL request. We'll send that Statement to Pelosi's office (and to the Senators and the relevant LA-area Rep); we can also, per your request, give Robert of Pelosi's office an informal heads-up about the State of California's forthcoming announcement.

Regards,

Mike Alpern - Director, Public Affairs
U.S. EPA Region 9 (Pacific Southwest)

Thanks for connecting these dots, William! I heard my SEMD Director @Montgomery, Michael mention today that an announcement by the State may be expected this Friday. He or @Alpern, Michael could confirm that notification to Congressionals is part of our own comms strategy. I've looped them here!

I think I heard just now that there may be news on this topic soon. Can you please make sure we give Pelosi's office appropriate heads up?

Robert,
Thanks for your patience.

EPA Region 9 works closely and collaboratively with Cal EPA and the California Department of Toxic Substance Control regarding federal and state Pb/lead cleanup work in communities throughout California. Communities facing environmental justice concerns, such as the community adjacent to Exide, have often faced disproportionate impacts for too long and are top priorities for us. EPA Region 9 leadership is in regular communication with DTSC regarding cleanup work at the Exide site and impacted communities. Recognizing this relationship, it would not be appropriate for EPA to comment on any deliberations internal to Cal EPA or DTSC regarding whether to request Superfund listing of any site.

Please let me know if you have additional questions our team can answer. We appreciate your interest in addressing lead contamination in Region 9!

Hey Robert--My colleague Laura Ebbert in Region 9 was looking into this and planned on circling back this morning. I am looping her in here for update purposes.
